

Freddy Htoo

freddyhtoo2026@gmail.com | github.com/Freddy-Htoo

SUMMARY

IT support professional transitioning into software development and cybersecurity. Experienced troubleshooting technical issues and supporting end users, now building practical skills in Python, Flask, and secure application development through self-directed projects.

SKILLS

- Languages & Tools: Python, Flask, HTML/CSS, Git & GitHub
- Cybersecurity: fundamentals of network security, secure coding practices, currently expanding hands-on skills
- IT Support: troubleshooting, ticketing systems, hardware/software support, user training
- Currently learning: AI/LLM tools and applications, deployment (Render), REST APIs

EXPERIENCE

IT Helpdesk Technician (2024-2026) SMRU

1–2 years

- Provided first- and second-line technical support to end users, resolving hardware, software, and network issues
- Documented recurring issues and solutions to improve team response time
- Assisted with account provisioning, password resets, and basic network troubleshooting

IT & Media Officer (2026-Current) KECD

- Provided first- and second-line technical support to end users, resolving hardware, software, and network issues
- Documented recurring issues and solutions to improve team response time
- Assisted with account provisioning, password resets, and basic network troubleshooting
- Camera shooting and video editing, website broadcasting, onsite technical support.
- Participate in traditional culture events, promoting technical support according to necessary points online, offline

PROJECTS

Personal Portfolio Website

- Built and deployed a Flask web application that dynamically pulls project data from the GitHub API
- Implemented secure API authentication using environment variables to raise rate limits
- Deployed live using Render, with continuous deployment from GitHub

EDUCATION

Bachelor's Degree, Computer Science
